

Assignment 2

How do Computer Vision algorithms see your photos?

Imagine that you are applying for a job. The company you are applying to is using computer vision algorithms to profile the applicants and help the HR manager to shortlist the best candidates. Upload the photo that you would include in your application to the tool the HR will use.

How to use the tool

- Go to: <http://ec2-3-249-45-201.eu-west-1.compute.amazonaws.com/opentag-protea/>
- Click choose an image and give your consent to all the necessary statements
- Upload your image and then click “Analyze”
- The list of words that three different computer vision algorithms would use to describe your image will then appear
- Complete the questionnaire and click “Submit”
